SKILLS

React JS, Net Core, Node Js, Docker, Flutter | Full Stack Developer.

PROFILE

Software developer with a solid two-year experience in Full stack development. My main focus is on using cutting-edge technologies like React, Flutter, Node JS and Net Core to create robust and efficient solutions.

EXPERIENCE

Software Engineer June 2022 - Present
Encora

Collaboration in the development of a workspace and parking reservation system. Additionally, I also developed an attendance marking system for employees and implement clean architecture for the project. Technologies used are React, Net Core, Docker and Flutter.

Freelance Software Developer April 2021 - Present
Workana

Specialized freelance in the development of web applications using .NET Core and React JS. Extensive experience in creating efficient and scalable solutions, combining the power of backend with .NET Core and the interactivity of frontend with React JS. Capable of working independently, adapting to client requirements, and delivering high-quality projects on time.

Full Stack Developer November 2021 – June 2022
MilSoluciones

I collaborated in the development of request modules using Angular on the frontend and Asp Core on the backend, ensuring efficient and scalable solutions. I contributed to the backend development using Laravel and handled email sending configuration. Additionally, I participated in the frontend development using Vue.js with Inertia JS, delivering an interactive and appealing user experience

EDUCATION

Software Engineer February 2018 - Present
Universidad para el Desarrollo e Innovación (UDI)
Design, programming, and maintenance of computer systems
