SKILLS

React JS, Net Core, Docker, Next JS | Full Stack Developer.

PROFILE

Software developer with a solid three-year experience in Full stack development. My main focus is on using cutting-edge technologies like React JS and Net Core to create robust and efficient solutions.

EXPERIENCE

Software Engineer   January 2024 – Present
Dialy
I have developed a comprehensive system for a clinic, which includes appointment scheduling and inventory management features. The system is built using React Native and Net Core.

Software Engineer   June 2022 – December 2023
Encora

Collaboration in the development of a workspace and parking reservation system. Additionally, I also developed an attendance marking system for employees and implement clean architecture for the project and also maintenance of invoice system. Technologies used are React, Net Core, Docker and Flutter.

Freelance Software Developer   April 2021 - Present
Workana

Specialized freelance in the development of web applications using .NET Core and React JS. Extensive experience in creating efficient and scalable solutions, combining the power of backend with .NET Core and the interactivity of frontend with React JS. Capable of working independently, adapting to client requirements, and delivering high-quality projects on time.

Full Stack Developer   November 2021 – June 2022
MilSoluciones

I collaborated in the development of request modules using Angular on the frontend and Asp Core on the backend, ensuring efficient and scalable solutions. I contributed to the backend development using Laravel and handled email sending configuration. Additionally, I participated in the frontend development using Vue.js with Inertia JS, delivering an interactive and appealing user experience

EDUCATION

Software Engineer   February 2018 – December 2023
Universidad para el Desarrollo e Innovación (UDI)
Design, programming, and maintenance of computer systems

LANGUAGES

Spanish Native   **English** Intermediate (B1)
